

These pretty snowflakes are fun to make!

What you will need

- Colored paper, or printable template
- Scissors
- Glue
- String for hanging

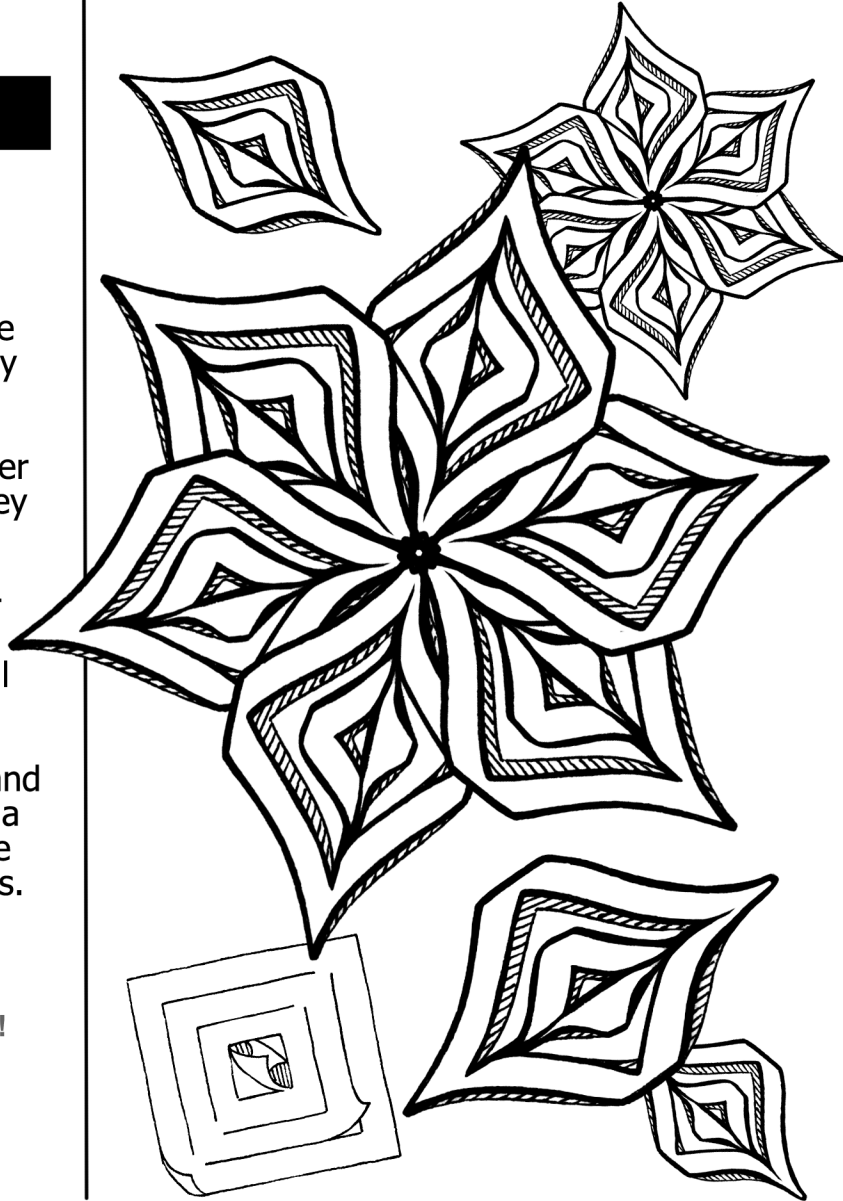

Directions

- 1** Cut six squares of equal size (see template). Fold each square along the diagonal, and then fold again.
- 2** Cut three slits down from the folded edge (see template) without cutting all the way through. Repeat for all squares.
- 3** Unfold each piece and grab the two center points on the square. Curl them until they touch and glue the points together.
- 4** Flip the square over and do the same for the next point. Do this for all points, alternating back and forth. Repeat for all squares.
- 5** Once you have all six petals assembled and the glue is dry, place them together into a snowflake shape and glue together in the center and where they touch on the sides.
- 6** Tie some string at the top and hang.
