

What you will need

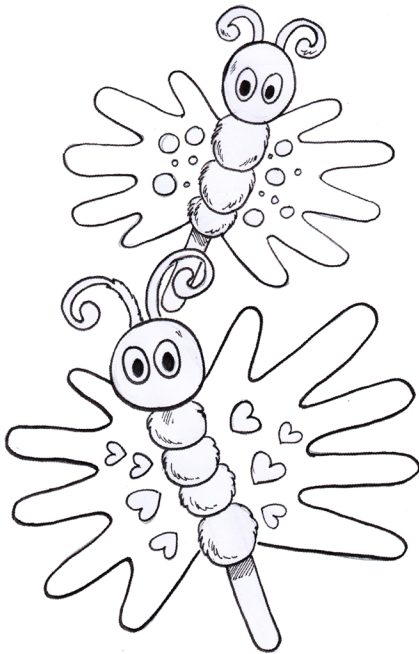

- 1 sheet construction paper (any color)
- 1 pipe cleaner (any color)
- 1 popsicle stick
- 4 pom poms (1/2 inch)
- 1 pom pom (1 inch)
- 2 googly eyes (3/16 inch)
- Scissors
- Pencil
- Markers
- Tacky glue

Let's get creative

Preparation Notes:

- 1 Fold the piece of construction paper in half. Place your hand on the folded edge of the paper so there's about 2 inches between the fold and the end of the thumb. Trace an outline around the handprint and cut the pattern. Open the paper handprint and color the wings.
- 2 To make the antennae cut a pipe cleaner to be approximately 4 inches long. Fold the pipe cleaner in half, into a V shape. Pinch one end of the pipe cleaner and roll it into a spiral. Repeat to make a spiral with the other end of the pipe cleaner.
- 3 To make the body add a glob of tacky glue to one end of the popsicle stick. Press the bottom of the pipe cleaner antennae onto the glob of glue. Continue using the tacky glue to first attach the larger pom pom, then the smaller pom poms to the popsicle stick. Leave about 2 inches of the popsicle stick empty so you'll be able to hold the butterfly as a puppet. Attach the googly eyes to the large pom pom, again using tacky glue.
- 4 Attach the body by squeezing a line of tacky glue down the fold in the paper handprint. Press the popsicle stick body onto the paper handprint. Your handprint butterfly is complete!
