Leprechaun Trap

- 1** Decorate the outside and inside of the box using paint or construction paper. Set aside to dry.

Time to make the base for the cloud/rainbow trail! Take a sheet of construction paper and cut in half vertically. Glue both pieces together to make a long trail. Glue one end to the inside of the box.
- 2**
- 3** Cut different colored strips of construction paper to create the rainbow on the far end of the trail.
- 4** Glue several pieces of cotton balls onto the section of trail closest to the box.
- 5** Scatter and glue plastic coins onto the trail.
- 6** Twist and tie a few pipe cleaners together to create a rainbow. Glue each end over the cotton ball section of the trail.
- 7** Tie string or ribbon onto a chopstick and place inside the box (ribbon/string down)

When you see a Leprechaun follow the gold trail into the box, pull the ribbon to yank out the dowel and trap them!

Happy St. Patrick's Day!
