

What you will need

- Colored Construction Paper
- Jumbo Craft Sticks
- Markers
- Googly Eyes
- Acrylic Paint
- Paint Brushes
- Glue Stick
- Scissors

Let's Get Creative!

- 1** You can either leave the jumbo craft sticks as is or paint a deeper brown color.
- 2** Cut strips from the color construction paper for the main body. This is where you can start to make your bugs your own. How many strips you use is up to you. How big they are, etc. It's up to you. Cut the strips in half because they don't need to be that long.
- 3** Apply glue stick to one end of the paper strip, form a loop and hold together to secure. Do the same with the other loops.
- 4** Cut wing shapes from another shade of construction paper. The best way to do this is to fold the paper in half and cut, so both the wings are the same size. You will also need to cut a long V shape from the same color as the wings for the bugs antennae.
- 5** Decorate the wings in whatever pattern you want with colorful markers or paint and glue the wings in place towards the top of the craft stick.
- 6** Glue the body loop over the wings, leaving space at the top of the craft stick. Glue the antennae in place at the top of the craft stick and stick the head loop over the body loop. And, if you've made more loops, glue those in place, as well.
- 7** Finish by adhering googly eyes. Use the black marker to draw a simple mouth. Also, curl the ends of the antennae with your fingers.
