

### What you will need

- Plaster of Paris
- Water
- Can
- Stirring stick
- Cardboard strip
- Paper clip

### Let's get creative

#### Preparation Notes.

- 1 When you've found a good animal track you'd like to preserve, clean the area around it from any excess dirt and twigs.
- 2 Make a ring around the track with a 1 inch strip of cardboard. Fasten the ends together with the paper clip.
- 3 In the can, mix the plaster and water according to the package's instructions. Stir well. Pour immediately first around the edges of the ring, then into the animal track.
- 4 Allow plaster to harden for about an hour, then peel off the cardboard collar. Wash off any residual dirt.
