# Patch Iron-On Instructions

---

We have made the application of your patches even SNAPPIER! Nearly all of our patches have an IRON-ON BACKING. Check the patch description for IRON-ON or call if you have questions.

## **HOW TO IRON-ON YOUR SNAPPYLOGOS PATCHES:**

1. Pre-heat your iron to the Cotton/Linen setting; no steam.
2. Test your fabric. Check your care instructions to be sure your fabric can handle a HOT iron. Remember Nylon, felt, and other delicate fabrics may burn under the hot iron.
3. Work on top of a hard surface such as a heat resistant cutting board (wood) or phone book.
4. Layout the garment or area of application.
5. Place the patch in desired location, cover with a thin pressing cloth or parchment paper.
6. Press and hold the iron for 30 seconds. Remove the iron and check fabric & patch. Cover and press again for 30 seconds.
7. Let cool and check the corners, apply additional heat if necessary. Iron temperatures may vary, so if necessary press for an additional 30 seconds. Cool and test corners.
8. Wash inside-out with cool water and medium dryer.

### Hints:

Remember do not attempt to iron patches onto NYLON jackets, or NYLON totebags. For this type of application we might suggestion ES6000 Glue, it is a very useful for many types of uses and will glue just about anything.
