

Try this interesting method for making a pumpkin decoration

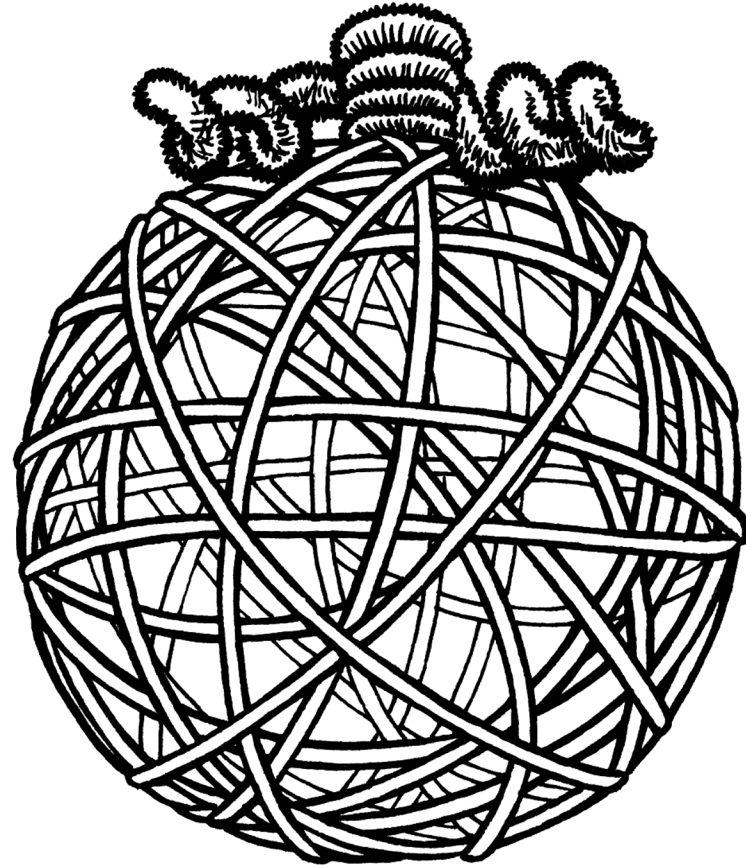

What you will need

- Rubber Balloons
- Green and Brown Pipe Cleaners
- Orange Yarn
- Craft Glue

Let's Get Creative!

- 1** Inflate a balloon halfway and tie off. Pour glue into a bowl and put a long strand of yarn (at least 5 feet of it) into the glue. Work it into the glue, making sure all of it is coated.
- 2** Slowly wrap your sticky yarn around the balloon like you would a yarn ball until you come to the end of the strand. Set aside to dry overnight.
- 3** Once dry, use your fingers between the strands to carefully push and poke the balloon away from the yarn. Use something sharp to poke a small hole towards the knot of the balloon. Allow to deflate slowly. The yarn should stay in the shape of the inflated balloon.
- 4** Curl a brown pipe cleaner tightly to form a pumpkin stem, and curl the green pipecleaner loosely to make vines. Glue together on the top of the yarn ball.
